

## [EL10] Construction and Renovation of Students' Association Facilities

---

With respect to all construction and renovation of Students' Association facilities, the CEO will not deviate materially from Board *ENDS* or compromise Board *ENDS* priorities.

1. Recognizing the three main criteria in construction and renovation as being cost, performance, and time, the CEO will not:
  - (1) Allow the cost of a project to deviate from Board *ENDS* or risk financial jeopardy,
  - (2) Allow the performance of a project to deviate from Board *ENDS*,
  - (3) Allow any new construction or renovations to significantly disrupt academic activity or the Students' Association's ability to deliver its services to its clients, or
  - (4) Allow any new construction or renovation to be performed without consultation with the clients.
2. Recognizing the need for Student Centres to be built, the CEO will not fail to consider the Algonquin College Master Plan.
